Xpointer

PINPOINTER METAL DETECTOR FOR TREASURE HUNTING

Fire in the hole!!

"The Xpointer save your digging time and easy to use"

Xpointer is one of the greatest tool in a treasure hunters arsenal! They can help you locate the exact spot where your treasure lies after it has been discovered with your standard metal detector. Read the below and be sure to watch the pinpointer videos below.

Xpointer is a miniaturized powerful metal detector. With the free mount you can clip it on the most metal detectors shaft or shovel handle. You can also put it in the holster to carry on the belt.

The point of the tool contains the miniature metal detector coil we call it ferrite core coil. When it is in very close proximity to metal it will alert you by sound or vibration. These tool are normally inserted into the hole you have dug where you think the treasure lies. Xpointer is a variable alarm design which is mean, when close to metal, the Xpointer will increase its vibrations and beeps will become more continuous. In this way it guides you to the treasure.

Xpointer
